COPYING

The *Journal* is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the U.S.A. which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to C.C.C. of the per-copy fee indicated. This consent does not extend to multiple copying for promotional or commercial purposes.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, U.S.A., is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from the Cambridge or New York office of the Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022–1120) is published in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £17.50 net (US $51.50 in the U.S.A. and Canada) plus postage. The subscription price (which includes postage) to volumes 102–113, 1981, is £210 (US $620.00 in the U.S.A. and Canada) for institutions; £105 (US $310.00) for individuals. Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in U.S.A. and Canada to Cambridge University Press, 32 East 57th Street, New York, N.Y. 10022.

INDEX OF AUTHORS OF PAPERS

Abas, S.
Stability of a Hartmann boundary layer under the influence of a parallel magnetic field, **32**, 1968, 721–735
The effect of a parallel magnetic field on the stability of free boundary-layer type flows of low magnetic Reynolds number, **38**, 1969, 243–253

Abbas, M. A. & Latham, J.
The instability of evaporating charged drops, **30**, 1967, 663–670

Abbott, T. N. G. & Walters, K.
Rheometrical flow systems. Part 2. Theory for the orthogonal rheometer, including an exact solution of the Navier–Stokes equations, **40**, 1970, 205–213
Rheometrical flow systems. Part 3. Flow between rotating eccentric cylinders, **43**, 1970, 257–267

Abd-El-Fattah, A. M. & Henderson, L. F.
Shock waves at a fast–slow gas interface, **86**, 1978, 15–32
Shock waves at a slow–fast gas interface, **89**, 1978, 79–95

Abd-El-Fattah, A. M., Henderson, L. F. & Lozzi, A.
Precursor shock waves at a slow–fast gas interface, **76**, 1976, 157–176

Abdelmeguid, A. M. & Spalding, D. B.
Turbulent flow and heat transfer in pipes with buoyancy effects, **94**, 1979, 383–400

Abell, C. J. *See* Hunt, Abell, Peterka & Woo; Perry & Abell

Abell, S. *See* Hudson, Tang & Abell

Abelson, H. I.
Pressure measurements in the water-entry cavity, **44**, 1970, 129–144

Abernathy, F. H. *See* Bullock, Cooper & Abernathy; Paterson & Abernathy

Abernathy, F. H. & Kronauer, R. E.
The formation of vortex streets, **13**, 1962, 1–20

Ablowitz, M. J. & Segur, H.
On the evolution of packets of water waves, **92**, 1979, 691–715

Abramovich, S. & Solan, A.
The initial development of a submerged laminar round jet, **59**, 1973, 791–801

Achenbach, E.
Distribution of local pressure and skin friction around a circular cylinder in cross-flow up to $Re = 5 \times 10^6$, **34**, 1968, 625–639
Influence of surface roughness on the cross-flow around a circular cylinder, **46**, 1971, 321–335
Experiments on the flow past spheres at very high Reynolds numbers, **54**, 1972, 565–575
Vortex shedding from spheres, **62**, 1974, 209–221
The effects of surface roughness and tunnel blockage on the flow past spheres, **65**, 1974, 113–125

Acheson, D. J.
On the hydromagnetic stability of a rotating fluid annulus, **52**, 1972, 529–541
The critical level for hydromagnetic waves in a rotating fluid, **53**, 1972, 401–415
Valve effect of inhomogeneities on anisotropic wave propagation, **58**, 1973, 27–37
Hydromagnetic wavelike instabilities in a rapidly rotating stratified fluid, **61**, 1973, 609–624
On over-reflexion, **77**, 1976, 433–472
'Stable' density stratification as a catalyst for instability, **96**, 1980, 723–733

Acheson, D. J., Andrews, D. G., Walton, I. C. & Hocking, L. M.
Nonlinear processes in rotating fluids: a report on Euromech 56, **71**, 1975, 241–250

Acheson, D. J. & Gibbons, M. P.
Magnetic instabilities of a rotating gas, **85**, 1978, 743–757

Achia, B. U. & Thompson, D. W.
Structure of the turbulent boundary in drag-reducing pipe flow, **81**, 1977, 439–464

Ackerberg, R. C.
The viscous incompressible flow inside a cone, **21**, 1965, 47–81
On a non-linear theory of thin jets. Part 1, **31**, 1968, 583–601
On a non-linear theory of thin jets. Part 2. A linear theory for small injection angles, **33**, 1968, 261–272
Boundary-layer separation at a free streamline. Part 1. Two-dimensional flow, **44**, 1970, 211–225 (and Corrigendum, **59**, 1973, 662)
Boundary-layer separation at a free streamline. Part 2. Numerical results, **46**, 1971, 727–736 (and Addendum, **47**, 1971, 825–826)
Boundary-layer separation at a free streamline. Part 3. Axisymmetric flow and the flow downstream of separation, **59**, 1973, 645–663
The effects of capillarity on free-streamline separation, **70**, 1975, 333–352
See also Phillips & Ackerberg

Ackerberg, R. C., Patel, R. D. & Gupta, S. K.
The heat/mass transfer to a finite strip at small Péclet numbers, **86**, 1978, 49–65
Ackerberg, R. C. & Phillips, J. H.
The unsteady laminar boundary layer on a semi-infinite flat plate due to small fluctuations in the magnitude of the free-stream velocity, **51**, 1972, 137–157
Ackroyd, J. A. D.
Stress work effects in laminar flat-plate natural convection, **62**, 1974, 677–695
Acosta, A. J. *See* James & Acosta
Acrivos, A.
The asymptotic form of the laminar boundary-layer mass-transfer rate for large interfacial velocities, **12**, 1962, 337–357 (and Corrigendum, **14**, 1962, 477)
Heat transfer at high Péclet number from a small sphere freely rotating in a simple shear field, **46**, 1971, 233–240
A note on the rate of heat or mass transfer from a small particle freely suspended in a linear shear field, **98**, 1980, 299–304
See also Barthès-Biesel & Acrivos; Berg, Boudart & Acrivos; Davis & Acrivos; Frankel & Acrivos; Goddard & Acrivos; Grove, Shair, Petersen & Acrivos; Hinch & Acrivos; Klemp & Acrivos; Kossack & Acrivos; Leal & Acrivos; Liang, Vidal & Acrivos; Nir & Acrivos; Nir, Weinberger & Acrivos; Pan & Acrivos; Poe & Acrivos; Rallison & Acrivos; Robertson & Acrivos; Shair, Grove, Petersen & Acrivos; Taylor & Acrivos; Vidal & Acrivos; Youngren & Acrivos
Acrivos, A. & Goddard, J. D.
Asymptotic expansions for laminar forced-convection heat and mass transfer. Part 1. Low speed flows, **23**, 1965, 273–291
Acrivos, A. & Herbolzheimer, E.
Enhanced sedimentation in settling tanks with inclined walls, **92**, 1979, 435–457
Acrivos, A., Leal, L. G., Snowden, D. D. & Pan, F.
Further experiments on steady separated flows past bluff objects, **34**, 1968, 25–48
Acrivos, A. & Lo, T. S.
Deformation and breakup of a single slender drop in an extensional flow, **86**, 1978, 641–672
Acrivos, A., Snowden, D. D., Grove, A. S. & Petersen, E. E.
The steady separated flow past a circular cylinder at large Reynolds numbers, **21**, 1965, 737–760
Acton, E.
The modelling of large eddies in a two-dimensional shear layer, **76**, 1976, 561–592
A modelling of large eddies in an axisymmetric jet, **98**, 1980, 1–31
Adam, J. A. *See* Craik & Adam
Adamczyk, J. J. *See* Goldstein, Braun & Adamczyk
Adams, J. K. & Buchwald, V. T.
The generation of continental shelf waves, **35**, 1969, 815–826
Adams, M. L. *See* Szeri & Adams
Adamson, T. C.
Solutions for supersonic rotational flow around a corner using a new co-ordinate system, **34**, 1968, 735–758
Unsteady transonic flows in two-dimensional channels, **52**, 1972, 437–449
See also Messiter & Adamson
Adamson, T. C. & Richey, G. K.
Unsteady transonic flows with shock waves in two-dimensional channels, **60**, 1973, 363–382
Adler, J. & Sowerby, L.
Shallow three-dimensional flows with variable surface tension, **42**, 1970, 549–559
Adrian, R. J.
Turbulent convection in water over ice, **69**, 1975, 753–781
Afzal, N.
A higher order theory for compressible turbulent boundary layers at moderately large Reynolds number, **57**, 1973, 1–25
Afzal, N. & Narasimha, R.
Axisymmetric turbulent boundary layer along a circular cylinder at constant pressure, **74**, 1976, 113–128
Afzal, N. & Yajnik, K.
Analysis of turbulent pipe and channel flows at moderately large Reynolds number, **61**, 1973, 23–31
Aggarwal, M. *See* Singh, Sinha & Aggarwal
Agrawal, Y., Talbot, L. & Gong, K.
Laser anemometer study of flow development in curved circular pipes, **85**, 1978, 497–518
Ahlborn, B. *See* Strachan, Huni & Ahlborn
Ahlers, G.
Effect of departures from the Oberbeck–Boussinesq approximation on the heat transport of horizontal convecting fluid layers, **98**, 1980, 137–148
Ahlstrom, H. G.
Experiments on the upstream wake in magneto-fluid dynamics, **15**, 1963, 205–222
Ahmad, Q. A., Luxton, R. E. & Antonia, R. A.
Characteristics of a turbulent boundary layer with an external turbulent uniform shear flow, **77**, 1976, 369–396
Ahrens, C. D. *See* Ronneberger & Ahrens
Akamatsu, T. *See* Fujikawa & Akamatsu
Akinrelere, E. A.
The calculation of inviscid hypersonic flow past the lower surface of a delta wing, **44**, 1970, 113–127

Akinshin, V. D. *See* Porodnov, Suetin, Borisov & Akinshin

Aldridge, K. D. & Toomre, A.
Axisymmetric inertial oscillations of a fluid in a rotating spherical container, **37**, 1969, 307–323

Alexander, A. J. *See* Morsi & Alexander

Alker, G.
The scattering of short surface waves by a cylinder, **82**, 1977, 673–686

Allan, J. D. *See* Savic, Allan & Blokland

Allan, W. K.
The continuously critical turbulent boundary layer, **15**, 1963, 251–261

Allen, J. R. L.
Note on the use of plaster of paris in flow visualisation, and some geological applications, **25**, 1966, 331–335
Bed forms due to mass transfer in turbulent flows: a kaleidoscope of phenomena, **49**, 1971, 49–63

Allen, J. S.
The effect of weak stratification and geometry on the steady motion of a contained rotating fluid, **43**, 1970, 129–144
Some aspects of the initial-value problem for the inviscid motion of a contained, rotating, weakly-stratified fluid, **46**, 1971, 1–23
Upwelling of a stratified fluid in a rotating annulus: steady state. Part 1. Linear theory, **56**, 1972, 429–445
Upwelling of a stratified fluid in a rotating annulus: steady state. Part 2. Numerical solutions, **59**, 1973, 337–368

Allen, J. S. & Romea, R. D.
On coastal trapped waves at low latitudes in a stratified ocean, **98**, 1980, 555–585

Allen, R. F.
The effects of interference and viscosity in the Kelvin ship-wave problem, **34**, 1968, 417–421

Allen, S. J. & DeSilva, C. N.
A theory of transversely isotropic fluids, **24**, 1966, 801–821

Alpher, R. A.
The Saha equation and the adiabatic exponent in shock wave calculations, **2**, 1957, 123–126

Alpher, R. A. & White, D. R.
Flow in shock tubes with area change at the diaphragm section, **3**, 1958, 457–470

Alsmeyer, H.
Density profiles in argon and nitrogen shock waves measured by the absorption of an electron beam, **74**, 1976, 497–513

Alty, C. J. N.
Magnetohydrodynamic duct flow in a uniform transverse magnetic field of arbitrary orientation, **48**, 1971, 429–461

Aly, A. M. M., Trupp, A. C. & Gerrard, A. D.
Measurements and prediction of fully developed turbulent flow in an equilateral triangular duct, **85**, 1978, 57–83

Alzner, E. *See* Baron & Alzner

Amen, R. & Maxworthy, T.
The gravitational collapse of a mixed region into a linearly stratified fluid, **96**, 1980, 65–80

Amiet, R. K.
Low-frequency approximations in unsteady small perturbation subsonic flows, **75**, 1976, 545–552

Amiet, R. K. & Sears, W. R.
The aerodynamic noise of small-perturbation subsonic flows, **44**, 1970, 227–235

Amr, A. & Kassoy, D. R.
A note on the description of an attached supersonic boundary layer near a point of injection cut-off, **71**, 1975, 455–463

Anand, R. K. *See* Quarmby & Anand

Anati, D. A., Assaf, G. & Thompson, R. O. R. Y.
Laboratory models of sea straits, **81**, 1977, 341–351

Andersen, P. S., Kays, W. M. & Moffat, R. J.
Experimental results for the transpired turbulent boundary layer in an adverse pressure gradient, **69**, 1975, 353–375

Anderson, D. G.
Numerical solutions of the Krook kinetic equation, **25**, 1966, 271–287
On the steady Krook kinetic equation: Part 1, **26**, 1966, 17–35

Anderson, J. S., Jungowski, W. M., Hiller, W. J. & Meier, G. E. A.
Flow oscillations in a duct with a rectangular cross-section, **79**, 1977, 769–784

André, J. C. *See* Pouquet, Lesieur, André & Basdevant

André, J. C. & Lesieur, M.
Influence of helicity on the evolution of isotropic turbulence at high Reynolds number, **81**, 1977, 187–207

Andreopoulos, J. & Bradshaw, P.
Measurements of interacting turbulent shear layers in the near wake of a flat plate, **100**, 1980, 639–668

Andrews, D. G. *See* Acheson, Andrews, Walton & Hocking

Andrews, D. G. & Hide, R.
Hydromagnetic edge waves in a rotating stratified fluid, **72**, 1975, 593–603

Andrews, D. G. & McIntyre, M. E.
An exact theory of nonlinear waves on a Lagrangian-mean flow, **89**, 1978, 609–646
On wave-action and its relatives, **89**, 1978, 647–664 (and Corrigendum, **95**, 1979, 796)

Andrews, J. G., Atthey, D. R. & Byatt-Smith, J. G.
Weld-pool sag, **100**, 1980, 785–800

Andrews, J. G. & Craine, R. E.
Fluid flow in a hemisphere induced by a distributed source of current, **84**, 1978, 281–290
Anker, D. & Freeman, N. C.
Interpretation of three-soliton interactions in terms of resonant triads, **87**, 1978, 17–31
Antonia, R. A.
Conditionally sampled measurements near the outer edge of a turbulent boundary layer, **56**, 1972, 1–18
See also Ahmad, Luxton & Antonia; Sreenivasan, Antonia & Britz
Antonia, R. A. & Atkinson, J. D.
High-order moments of Reynolds shear stress fluctuations in a turbulent boundary layer, **58**, 1973, 581–593
Use of a pseudo-turbulent signal to calibrate an intermittency measuring circuit, **64**, 1974, 679–699
Antonia, R. A. & Bilger, R. W.
An experimental investigation of an axisymmetric jet in a co-flowing air stream, **61**, 1973, 805–822
Antonia, R. A., Danh, H. Q. & Prabhu, A.
Response of a turbulent boundary layer to a step change in surface heat flux, **80**, 1977, 153–177
Antonia, R. A. & Luxton, R. E.
The response of a turbulent boundary layer to a step change in surface roughness. Part 1. Smooth to rough, **48**, 1971, 721–761
The response of a turbulent boundary layer to a step change in surface roughness. Part 2. Rough to smooth, **53**, 1972, 737–757
Antonia, R. A., Phan-Thien, N. & Chambers, A. J.
Taylor's hypothesis and the probability density functions of temporal velocity and temperature derivatives in a turbulent flow, **100**, 1980, 193–208
Antonia, R. A., Prabhu, A. & Stephenson, S. E.
Conditionally sampled measurements in a heated turbulent jet, **72**, 1975, 455–480
Antonia, R. A. & Van Atta, C. W.
On the correlation between temperature and velocity dissipation fields in a heated turbulent jet, **67**, 1975, 273–288
Structure functions of temperature fluctuations in turbulent shear flows, **84**, 1978, 561–580
Aoki, H. *See* Uchida & Aoki
Apelt, C. J.
Hartmann flow in annular channels. Part 2. Numerical solutions for low to moderate Hartmann numbers, **37**, 1969, 209–229
Apelt, C. J. & Ledwich, M. A.
Heat transfer in transient and unsteady flows past a heated circular cylinder in the range $1 \leqslant R \leqslant 40$, **95**, 1979, 761–777
Apelt, C. J. & West, G. S.
The effects of wake splitter plates on bluff-body flow in the range $10^4 < R < 5 \times 10^4$. Part 2, **71**, 1975, 145–160
Apelt, C. J., West, G. S. & Szewczyk, A. A.
The effects of wake splitter plates on the flow past a circular cylinder in the range $10^4 < R < 5 \times 10^4$, **61**, 1973, 187–198
Appleton, J. P. & Bray, K. N. C.
The conservation equations for a non-equilibrium plasma, **20**, 1964, 659–672
Arakeri, V. H.
Viscous effects on the position of cavitation separation from smooth bodies, **68**, 1975, 779–799
Ardavan-Rhad, H.
The decay of a plane shock wave, **43**, 1970, 737–751
Aref, H. & Siggia, E. D.
Vortex dynamics of the two-dimensional turbulent shear layer, **100**, 1980, 705–737
Arie, M. *See* Kiya & Arie
Arie, M. & Rouse, H.
Experiments on two-dimensional flow over a normal wall, **1**, 1956, 129–141
Arora, N. L.
An integral-transform method for shock–shock interaction studies, **34**, 1968, 209–228
Correction to Smyrl's results for thin yawed wedges, **41**, 1970, 653–654
Arora, S. C. & Azad, R. S.
Applicability of the isotropic vorticity theory to an adverse pressure gradient flow, **97**, 1980, 385–404
Arpaci, V. S. *See* Gözüm & Arpaci; Korpela & Arpaci; Vest & Arpaci
Arunachalam, Vr. *See* Bryson, Arunachalam & Fulford
Arya, S. P. S.
Buoyancy effects in a horizontal flat-plate boundary layer, **68**, 1975, 321–343
Asano, N.
Shock waves and non-stationary flow in a duct of varying cross-section, **46**, 1971, 111–128
Ashkenas, H. *See* Wegener & Ashkenas
Assaf, G. *See* Anati, Assaf & Thompson
Asthana, S. B. L. *See* Mohanty & Asthana
Astill, K. N. *See* Chung & Astill
Atabek, H. B. *See* Ling & Atabek
Atassi, H. *See* Goldstein & Atassi
Atassi, H. & Shen, S. F.
A unified kinetic theory approach to external rarefied gas flows. Part 1. Derivation of hydrodynamic equations, **53**, 1972, 417–431
A unified kinetic theory approach to external rarefied gas flows. Part 2. Application to a steady low-speed motion past a circular cylinder, **53**, 1972, 433–449
Atkinson, J. D. *See* Antonia & Atkinson; Henderson & Atkinson

Atten, P. *See* Hopfinger, Atten & Busse; Lacroix, Atten & Hopfinger

Atthey, D. R.
A mathematical model for fluid flow in a weld pool at high currents, **98**, 1980, 787–801
See also Andrews, Atthey & Byatt-Smith

Atwell, N. P. *See* Bradshaw, Ferriss & Atwell

Auchterlonie, L. J. *See* Barkla & Auchterlonie

Aucoin, P. J. *See* Newell & Aucoin; Newell, Lange & Aucoin

Audunson, T. & Gebhart, B.
An experimental and analytical study of natural convection with appreciable thermal radiation effects, **52**, 1972, 57–95

Axford, W. I.
The oscillating plate problem in magneto-hydrodynamics, **8**, 1960, 97–102

Ayad, A. M. & Leppington, F. G.
The diffraction of surface waves by plane vertical obstacles, **80**, 1977, 593–604
